sink your teeth into the ultimate homemade treat high in protein low in fat and tasty it s no surprise that jerky has been a popular snack for decades while commercially made jerky is easy to find in stores it has a few downsides it s expensive often high in sodium and the flavors are limited when you make your own jerky hunters can make use of their own game fishers can use their fresh catch and conscious consumers can use locally sourced meat of course the flavor options go far beyond cracked black pepper as well from

classics such as smoked salmon and teriyaki beef to more creative options such as spicy turkey savory tofu and soy and brown sugar venison the choice is yours author philip hasheider a butchery expert will walk you through basic butchery for larger cuts of meat how different muscles and fish translate into jerky and a variety of ways to prepare jerky using a food dehydrator or a smoker marinated flavored or plain and simple learn how to make the jerky you crave

in his comprehensive guide to weighing reasons chris tucker explains how to weigh reasons well from daily choices to complex ethical puzzles there are two central claims in the book the first concerns the weights of reasons namely weight pluralism the idea that reasons have more than one weight value and these values are not always equal a reason s justifying weight is how well it makes an act permissible a reason s requiring weight is how well it makes a permissible act required for instance the self interested reasons that make it permissible to go out for dinner one night generally do not also make it impermissible or wrong to stay home instead this fact is to be explained tucker argues by holding that self interested reasons have more justifying than requiring weight the second central claim concerns weighing reasons the most natural model for weighing reasons is single scale the idea that reasons are weighed on a single two sided scale since our reasons to eat out have more justifying weight than requiring weight single scale distorts how those reasons work if one were to put the reasons to go out on the left pan and the reasons to stay home on the right pan and the reasons to go out are weightier then single scale incorrectly entails that you are required to eat out i e eating out is permissible okay and staying home is impermissible wrong this verdict is incorrect because the self interested reasons that make it permissible to go out to eat tonight generally do not also make it wrong to stay home instead to properly represent such reasons tucker replaces single scale with dual scale which is the idea that reasons are weighed on two scales rather than one the book also addresses what the general issue of weighing reasons is whether they have commending weight whether weight values are context sensitive how to tell what the weights of reasons are how reasons for are related to reasons against and how the weights of reasons aggregate
